

## Astrazeneca Summer Internship 2025 AAV Molecular Biology Scientist

### Description

AstraZeneca, a leading pharmaceutical company, is offering a Summer Internship Program for 2024 for the position of AAV Molecular Biology Scientist in Congleton. This internship provides a unique opportunity for students to gain hands-on experience in the field of molecular biology, and to work alongside experienced professionals in the industry. This article will provide a detailed overview of the AstraZeneca Summer Internship Program for 2024, specifically for the AAV Molecular Biology Scientist position in Congleton.

### Responsibilities

Interns in the AAV Molecular Biology Scientist position at AstraZeneca in Congleton will have a variety of responsibilities, including designing and conducting experiments, analyzing and interpreting data, writing scientific reports, and presenting findings to the team. They will also work with a variety of laboratory equipment, and will collaborate with other members of the team on various projects.

### Qualifications

To be considered for the AAV Molecular Biology Scientist position in Congleton, candidates must be currently enrolled in an undergraduate or graduate program in a related field, such as molecular biology, biotechnology, or biochemistry. Candidates should have a strong understanding of molecular biology techniques, excellent communication and organizational skills, and the ability to work both independently and as part of a team. Candidates must be able to commit to the entire duration of the internship program.

### Job Benefits

Interns in the AAV Molecular Biology Scientist position at AstraZeneca in Congleton will have the opportunity to gain hands-on experience in molecular biology, as well as exposure to different aspects of the pharmaceutical industry. They will also receive mentorship from experienced professionals in the industry and will have the opportunity to learn about drug development and research. Additionally, interns will receive a competitive salary and may be eligible for academic credit.

### Contacts

To apply for the AstraZeneca Summer Internship Program for 2024, candidates should visit the AstraZeneca website and search for available internships. Candidates can also reach out to the AstraZeneca HR department for more information.

### Experience

Candidates for the AAV Molecular Biology Scientist position in Congleton should have previous experience in molecular biology, either through previous coursework, internships, or volunteer work. Candidates who have experience with AAV vector systems, gene therapy, and cell culture will be preferred.

### Skills

### Hiring organization

Astrazeneca

### Employment Type

Intern

### Duration of employment

6 months

### Industry

Pharmaceutical Biotechnology

### Job Location

Congleton, England, UK, CW12,  
Congleton, England, UK

### Working Hours

8

### Base Salary

10

### Date posted

September 15, 2024

### Valid through

19.05.2026

Interns in the AAV Molecular Biology Scientist position at AstraZeneca in Congleton should possess a variety of skills, including excellent communication and organizational skills, strong attention to detail, the ability to multitask and prioritize tasks, and a strong interest in molecular biology. Candidates should also have strong problem-solving skills and the ability to work well under pressure.

In conclusion, the AstraZeneca Summer Internship Program for 2023 for the AAV Molecular Biology Scientist position in Congleton is an excellent opportunity for students who are interested in pursuing a career in molecular biology. Interns will have the opportunity to gain valuable experience and skills, as well as exposure to different aspects of the pharmaceutical industry. Candidates who possess excellent communication and organizational skills, as well as a strong interest in molecular biology, are encouraged to apply.
