Nasa High School Internship 2025 Systems Engineering Year Round Internship

Description

If you are a high school student interested in pursuing a career in engineering or space exploration, you might want to consider the NASA Systems Engineering Year Round Internship in Greenbelt. This is an opportunity to work with some of the most innovative engineers and scientists in the world and gain hands-on experience in systems engineering.

Responsibilities

As a Systems Engineering Year Round Intern at NASA, your responsibilities may include assisting with the development and implementation of spacecraft systems, designing and testing hardware and software components, and supporting mission operations. You may also be responsible for analyzing data, preparing reports, and presenting findings to project teams.

Qualifications

To be considered for the Systems Engineering Year Round Internship at NASA, you should have a strong interest in engineering and space exploration. You should be able to work independently and collaboratively, have excellent problem-solving and analytical skills, and be proficient in computer programming languages. Additionally, you should have a minimum GPA of 3.0.

Job Benefits

The Systems Engineering Year Round Internship at NASA provides a unique opportunity to gain valuable experience in the field of engineering and space exploration. As an intern, you will have the opportunity to network with industry professionals, learn about the latest developments in space exploration, and develop your skills in systems engineering.
